

MRI NON-MAGNETIC CARBON DIOXIDE PORTABLE FIRE EXTINGUISHER Safe and Efficient Fire Suppression for MRI and Magnetic Environments

Product description:

This non-magnetic fire extinguisher is designed specifically for use in environments that require non-magnetic materials, such as MRI rooms and similar settings.

Key Features:

Non-Magnetic Construction: All parts are non-magnetic, ensuring safety in magnetic environments.

Portable Design: Lightweight aluminum container with stored pressure technology, containing 5 kg of carbon dioxide as the extinguishing agent.

Includes Wall Mounting: Comes with a wall mount and clamping ring for easy and secure installation.

Residue-Free Extinguishing: Allows for clean extinguishing without leaving residues.

Optimal Distribution: Gaseous extinguishing agents can be distributed effectively to quickly and efficiently suffocate fires.

Specifications:

Width: 330 mm

Height: 685 mm

Container Diameter: 152 mm

Container Material: Aluminum

Total Weight: 13 kg

Extinguishing Power: 5 units of extinguishing agent

Ratings: 89 B

Approval: EN 3

Temperature Range: -30°C to +60°C

Reference: IRM1518
