

MAVIG BR115 - X-RAY PROTECTIVE GLASSES Anti-radiation leaded protective glasses

Product description:

The X-ray protective glasses have slightly curved glasses and a protection of Pb 0.75 mm. The frame is made of an extremely durable plastic that ensures easy cleaning.

- Maximum lens break resistance
- High level of X-ray absorption
- Best light transmission values
- Comes with a storage case and a soft google strap

Quality Features. perfect for the Use in the Medical Environment

MAVIG uses only protective lenses of the highest quality. This guaranties the best light transmission values and a maximum lens break resistance. An ideal composition of the protective material results in a high level X-ray absorption, and optimized production processes achieve an absolute homogeneous allocation of the glass additives.
